Product Description	A seed of cannabis Sativa L, hemp is a non-drug variety of cannabis. This remarkable "superfood" is an excellent protein source embodying essential amino acid. Hemp seeds are an optimum source for fatty acids including omega 3-6-9 and vital minerals. The two main proteins in hemp seed are edestin and albumin. These high-quality storage proteins are easily digested and contain nutritionally significant amounts of amino acids. Reminiscent of a sunflower seed, raw hemp seeds are selected for the finest quality and then pressed at 43°C to separate the hemp oil from the solids to form a paste. Once the paste has dried into a cake, it is stone ground to hemp powder. The hemp seed powder is sifted to reduce fibre content whilst preserving a high proportion of protein. Organic Hemp Seed protein embodies a high protein content, which includes essential amino acids. Organic Hemp seed Protein powder is certified to EU organic standards according to Regulation (EU) 2018/848 and Great British Organic Standards by the Soil Association under the code GB-ORG-05
