Product Specification – Pineapple Pieces

1. Product Information:

Item	Description
Product Name	Pineapple Pieces
Product Code	SUFL7307

2. Composition and other Information:

2.1 Ingredients and Additives:

Ingredient/Additive	Part in (%) or (ppm)	Origin
Pineapple (SL, SC, MD2)	100 %	Ghana / West Africa
Free flow agent (Pineapple core flour)	2 % (customizable)	Ghana

2.2 Nutritional Information:

Analytical Value		Calculated value 100g contains (average)
Energy	**kJ**	1411 Kj
Energy	**kcal**	342 kcal
Fat		0.27 g
	of which saturated fatty acid	0.15 g
	of which trans-fatty acid	0.01 g
	of which mono-unsaturated fatty acid	0.1 g
	of which poly-unsaturated fatty acid	0.07 g
Carbohydrate		79.0 g
	of which sugars	67.0 g
Dietary fibre		7.6 g
Protein		2.9 g
Ash		1.96 g
Sodium as NaCl		0.018 g
Sodium		0.007 g
Potassium (K)		0.633 g
Calcium (Ca)		0.09 g
Iron (Fe)		0.00085 g
Vitamin A		0.000021 g
Vitamin D		0.0000022 g
Vitamin C		0.113g

3. Allergen and Food Intolerances:

Category	Free from	Included	Contamination <1000 mg/kg possible	Contamination >1000 mg/kg possible	Concerned ingredient
Cereals containing gluten like wheat, rye, barley, oat, spelt, and products derived from them	Yes	No	No	No	N/A
Milk and products derived from them (lactose included)	Yes	No	No	No	N/A

Eggs and products derived from them	Yes	No	No	No	N/A
Fish and products derived from them	Yes	No	No	No	N/A
Crustaceans and products derived from them	Yes	No	No	No	N/A
Soya beans and products derived from them	Yes	No	No	No	N/A
Peanuts and products derived from them	Yes	No	No	No	N/A
Walnuts, filberts (hazelnuts, cobnuts), almonds, pecans (hickory nuts), macadamia nuts (Queensland nuts, Australian nuts), cashew nuts, pistachios, pine nuts and products derived from them	Yes	No	No	No	N/A
Sesame seeds and products derived from them	Yes	No	No	No	N/A
Celery and products derived from them	Yes	No	No	No	N/A
Mustard and products derived from them	Yes	No	No	No	N/A
When sulphite is not used: Sulphites (E 223) in a concentration over 10 mg/kg or 10 mg/l	Yes	No	No	No	N/A

4. Gene Technology:

The raw material is GMO free and the final product does not contain any genetically modified components or processing agents.

5. General Information Regarding Production and Cleaning

5.1 Quality Management and Quality Assurance

Certification	Yes/No	Comment
HACCP	Yes	Certified under BRC (Global Standard For Food Safety)
BRC	Yes	Certified, Grade AA
Organic	Yes	Certified, EU, Bio Suisse and NOP
GMP	Yes	Being Implemented

The production takes place in accordance with a Codex Alimentarius based HACCP system which is regularly checked and adjusted.

The following other products are processed in the same production facility on the same production line:

Product	Maximum contamination with foreign material in %
Coconut	< 0.1 %
Mango	< 0.1 %
Papaya	< 0.1 %
Banana	< 0.1 %

Raw materials are stored in plastic crates at ambient temperature before processing.

5.2 Shelf Life

Shelf life of product from delivery	12 months
Storage conditions	Recommended to keep below 8 degree

5.3 Manufacturing Process

	Step	QA action
1	Fruit Reception	Temperature check, way bill check (approved origin)
		Check weight
2	Raw Material Check	Intake check
		-sugar
		-maturity: **minimum 15° brix,** colour and density
		-sound and fresh
3	Sorting	Weight checks
4	Washing	Potable water
5	Peeling	Remove peel and seed
6	Cutting	Sample check for size
7	Preservation (optional see pt6.2 and 8)	Check SO_2 concentration if required by customer
8	Distribution on Drying Rack	Check distribution per rack or tray
9	Drying	Timing, humidity and temperature check
10	Cooling down	Check of colouration, SO_2 and water content
11	Removing / Sorting	Grade according to size and colouration sorting out defect
12	Weighing	Check of colouration and weight
		Calibration of scales
13	Grinding	Check particle size
14	Application of free flow agent on request or as specified by customer in (point 8)	Ensure homogenous distribution
15	Packing and sealing	Check packing material and seal
16	Metal detection	Check sensitivity (calibration of metal detector)
17	Boxing	Check of labelling
18	Palletizing	Check of palletization
19	Dispatch	

5.4 Equipment Cleaning

Description of the cleaning of the production line

- Washing of production area with clean water and detergent, after each batch.
- Washing of production equipment with clean water and detergent after each batch.
- Soaking of drying trays in water and washing with high pressure cleaner, after each batch.

What metal detector sensitivity is used.	Fe: ø1.19mm	Not Fe: ø2.0mm	SUS: ø2.5mm
How are contamination avoided?	Foreign body control system		
How are breakables controlled?	Breakable control procedure is part of start-up procedure.		

5.5 Germs Reducing Operations

What germs reducing operations are carried out?	Fruit wash at intake, all production processes in controlled environment and heat treatment.

No irradiation is carried out.

6. Quality:

6.1 Sensory Properties

Appearance: typical, uniform, sound yellow – orange colour	
Odour and Taste	Typical balanced sweet and acidic pineapple taste
Texture and Structure	Soft to chew and dry
Size	< 10 mm

6.2 Chemical and Physical Data

Criterion	Unit/Value	Method	Frequency
Intrinsic foreign material: seeds, skin or spots	Max 0.5 % of weight	Visual separation procedure	Per batch
Humidity	10 – 13 %	Using a halogen moisture analyser recording % wet mass. Reference to AOAC 934.06	Per batch
Pineapple without SO_2	< 10 ppm	Monier Willeams	Per batch
Brix of dry pineapple	>63°	Internal Brix check method	Per batch
Water activity	< 0.65	Water activity meter	Per batch
Plant Protective Agents residues	Below EC MRLs	Multi residue testing	quarterly

6.3 Quality Deviation

Criterion	Standards	Deviation	Percentage deviation
Cloour	Uniform yellow to orange	Slight orange to brown	Less than 10 % of pieces
Pineapple	Uniform yellow to dark orange	Dark orange to brown	Less than 50 %
Size	< 10 mm	Less than 10 % to pieces	Less than 10 % of pieces
Brix	>63° brix	Sample shows brix lower than 63°	Not more than 10 % of samples below brix 63°
Moisture	10 – 13 %	1 % below or above range	Less than 10 % of measurements per batch

6.4 Microbiological

Criterion	Unit/Value	Frequency of routine analysis
Aerobic Plate Count (APC)	Max 10,000 CFU/g	Per quarter
E. Coli	Not detectable in 25 g	Per quarter
Mould	Max 5,000 CFU/g	Per quarter
Salmonella ssp	Not detected in 25 g	Per quarter
Staphylococcus (coagulase positive)	Not detectable	Per quarter
Yeast	Max 5,000 CFU/g	Per quarter

7. Logistics, packing and delivery information

Packaging	Carton
Content (kg)	5 x 2.5 kg plastic bag
Primary packing material	Secondary packaing material
PE bag, blue transparent	Dimension 385 x 295 x 275mm, 5 ply carton

Product Specification – Pineapple Pieces

Agreement of Specification – If no signed copy of this specification is received within 28 days of issue to the Customer then this will be considered accepted.
