Product Description	Rosa damascena or Persian rose is a small plant belonging to the Rosaceae family. It is a small plant with aromatic light pink flowers, which is known as Gole Mohammadi in Iran. They are highly cultivated all over the world, including Iran (especially in Kashan), for visual beauty and its use in production of fragrances. The products of Damask rose are rose water, rose oil and dried petals that are used in medicine, food and perfume industry, as well as make-up and health products. The flower petals are also edible. They may be used to flavour food, as a garnish, as an herbal tea, and preserved in sugar as gulkand.
